Subject: Applicability of Indirect Source Review (ISR) Rule 9510
Project Name: Atherton Drive Extension from Airport Way to Union Road
ISR Project No: C20130106

Dear Mr. Boyce:

The San Joaquin Valley Air Pollution Control District (District) received your Air Impact Assessment (AIA) Application Form on April 30, 2013.

Per section 2.2 of District Rule 9510 (Indirect Source Review), the rule applies to any transportation or transit project where construction exhaust emissions equal or exceed two tons of NO_x or two tons of PM₁₀. The District has analyzed the information provided in your application and determined that construction emissions will be less than two tons NO_x and two tons PM₁₀. Therefore, District Rule 9510 does not apply to the project referenced above.

This applicability determination is based on project related information provided by the applicant. Therefore, to maintain this status, the applicant must keep the following:

1. Records of construction start and end dates

Please be aware that changes to the project, such as project size, construction period, or extent of construction, effect emissions and may result in the project exceeding the applicability threshold. Consequently, please notify the District of any such changes to the project, and maintain a copy of this letter along with the requested records for District inspection upon request.

Seyed Sadredin
Executive Director/Air Pollution Control Officer
