**Wildwood – Oleander Estates, Unit 2**  
**Tract 3522 at E. Woodward Ave and S. Oleander Ave – Manteca**  
**DCP 976N**

Dear Mr. Bauman,

On July 18, 2013 the District received a Dust Control Plan (plan) for the above project, pursuant to section 6.3 of Rule 8021 – *Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities*. Upon review, the District hereby approves the plan.

Please note that all requirements of the applicable rules under Regulation VIII – *Fugitive PM10 Prohibitions* apply at all times. This includes the requirement to maintain a plan at the project site and to maintain any other supporting documents to demonstrate compliance with the rule requirements, per section 6.2 of Rule 8011– *General Requirements*. The current rules may be found at [www.valleyair.org](http://www.valleyair.org). In addition, approval is granted only for those activities conducted by you and your designated contractors as detailed in the plan. For approval to be extended to additional contractors involved in dust-generating activities, you must submit to the District the names and contact information for any additional contractors before they begin work on the site.

Should you have any questions, please telephone Adam Mumford at (209) 557-6433 or myself at (209) 557-6420.

Sincerely,

A handwritten signature in cursive script that reads "Thomas J. Busenbark".

Tom Busenbark  
Supervising Air Quality Inspector
